Summary

I am a senior IT management systems professional with software engineering background.

I started working as an engineer and soon learned about the management systems and quality methods which are crucial for obtaining the best results in my work. I have broad experience on ITIL, COBIT and CMMI frameworks and successfully completed projects on ISO 20000 and ISO 27001 certifications.

I was introduced to project management as a part of my work in TCS which became my way of working for over 10 years now. This experience gave me the chance of being the co-author of the PMI based Tofaş Project Management Internal Training Module for Tofaş Academy.

I am looking for a new career opportunity to share my experience in a new environment where I can also improve my skills.
